

Hydradermabrasion

The latest innovation currently trending in the skincare industry

Hydradermabrasion is a non-invasive skin treatment that uses patented technology to deeply cleanse, extract, as well as hydrate skin. The result is younger-looking, glowing, healthier skin. The Hydradermabrasion treatment has become one of the most popular facial treatments today.

The treatment is delivered in 3 stages...

1st Cleanse & Extract

Skin scrubber and hydrogen oxygen cleansing provides deep cleansing designed to unblock pores, remove excess grease and debris and removes dead skins cells to reveal a new layer of healthy skin.

2nd Hydrate

By using different currents like ultrasonic radio frequency it drives the products deeper into the skin and has a skin tightening effect in which stimulates collagen production thereby improving elasticity in the skin.

3rd Fuse & Protect

To finish, a cold treatment is used which helps to shrink pores, reduces sensitivity to rejuvenates and whitens the skin. In this final stage the hydrating qualities of the hydrogen oxygen mist penetrates the skin and increase skin vitality.

The treatment is personalise to you using the 6 different treatment heads to ensure you achieve the best results for your skin. A one off facial will give you a fantastic glow but to achieve the best results a course of 6 facials 3-4 weeks apart is recommended.

Who is an ideal candidate for Hydradermabrasion?

You are an ideal candidate for Hydradermabrasion if you have:

- Hyperpigmentation
- Fine lines and wrinkles
- Acne-prone skin
- Enlarged and congested pores
- Excessively oily skin
